ORIGINAL RESEARCH

Electronic Patient Records to Identify Patients in the United Kingdom with Diabetic Macular Oedema Suitable for ILUVIEN® (Fluocinolone Acetonide)

ABSTRACT

Introduction: We describe a proactive method using electronic patient records (EPR) to identify pseudophakic patients with diabetic macular oedema (DMO) that might benefit from treatment with 0.2 µg/day fluocinolone acetonide (FAC; ILUVIEN®) implant.

Methods: Our EPR audit tool (Medisoft®) identified diabetic patients (May 2011–December 2014) with National Screening Committee-confirmed grade M1 maculopathy. Searches segmented this DMO patient population into patient groups who: (1) had received ranibizumab therapy, (2) had received ≥2 macular laser treatments, or (3) were unsuitable for macular laser or ranibizumab therapy. Pre-specified criteria identified patients insufficiently responsive to treatment, and their electronic case notes were flagged for clinicians to consider FAC, based on National Institute for Health and Care Excellence (NICE) TA301.

Results: Using this methodology, 138 patients with DMO were identified, of whom 87 were assigned to group 1, 32 to group 2, and 29 to group 3 (10 patients were included in both groups 2 and 3). From these, 28 different pseudophakic eyes were identified as suitable for treatment with FAC, based on insufficient response to prior treatment.

Conclusion: EPR audit offers a real-world methodology to efficiently identify patients that might benefit from treatment with FAC. Limitations apply, and thorough documentation of lens status and ocular comorbidities is vital; however, this approach was more rapid than prospective recruitment through the clinic. Flagging patient records using EPR audit offers a practical process for application to clinical practice, thereby optimizing patient care in line with NICE TA301 guidelines.

[Dance Magazine: Bring in the Big Bucks: Three experts share their best fundraising tips.](#)

Let's face it: In the U.S., government support for the arts is severely limited. Most dance companies rely on donations to stay afloat. According to Smuin Contemporary Ballet development director Deb Glazer, ticket sales typically cover between 30 and 40 percent of all operating costs for most medium to large troupes. For those with feeder schools, roughly another 30 percent is covered by tuition. Grants can also benefit the bottom line, but they're few and far between. That means a major...

About The Free Library

Since 2003, The Free Library has offered free, full-text versions of classic literary works from hundreds of celebrated authors, whose biographies, images, and famous quotations can also be found on the site. Recently, The Free Library has been expanded to include a massive collection of periodicals from hundreds of leading publications covering Business and Industry, Communications, Entertainment, Health, Humanities, Law, Government, Politics, Recreation and Leisure, Science and Technology, and Social Sciences. This collection includes millions of articles dating back to 1984 as well as newly-published articles that are added to the site daily.

The Free Library is an invaluable research tool and the fastest, easiest way to locate useful information

STAMFORD, Conn., Nov. 15 /PRNewswire/ -- Purdue Pharma L.P. today announced a pilot program to integrate unique radio frequency identification (RFID) tags on labels for 100-tablet bottles of OxyContin(R) (oxycodone HCl controlled-release) Tablets shipped to two of its largest customers. Purdue is one of the first pharmaceutical companies to provide fully integrated, anti-counterfeiting packaging designed to protect pharmaceutical products against counterfeiting and diversion through individual electronic "license plates." It is also the first to comply with the multi-layered approach, including RFID, to combat counterfeit drugs recommended today by the FDA's Counterfeit Drug Task Force. The initial shipments of the RFID-tagged bottles will be sent this week to Wal-Mart and H.D. Smith, the seventh-largest drug wholesaler in the U.S.

RFID involves the placement of small electromagnetic chips on cartons, pallets, and individual product labels. This allows manufacturers and wholesalers to track products more closely than ever before as they move throughout the distribution process.

"Our objective in implementing these security features is to deter counterfeiting, reduce diversion, and help ensure the authenticity, safety, and integrity of our products," said Aaron Graham, Vice President and Chief Security Officer for Purdue Pharma. "RFID technology provides the pharmaceutical industry with the ability to create an electronic drug pedigree, or tracking mechanism, that will lead to greater supply chain security and patient protection against counterfeit drugs."

A drug "pedigree" is the paperwork that follows products from the manufacturer, to wholesaler, to pharmacy. It is more difficult to track the authenticity of drugs with incomplete pedigrees. Purdue's initiative addresses a number of consumer safety issues, including the redistribution of counterfeit, adulterated, re-labeled, and diverted prescription drugs of unknown authenticity, efficacy, and safety. Based on the availability of RFID tags, which are assembled in Maryland and Germany, Purdue plans to expand the implementation of RFID labels for all bottles of OxyContin Tablets.

"This is an outstanding collaboration between a manufacturer and distributor which will help protect the nation's supply of medicines and help ensure that patients receive only authentic, efficacious, and safe products," said John Burke, Vice President, National Association of Drug Diversion Investigators and Coordinator, Southern Ohio Prescription Drug HIDTA (High Intensity Drug Trafficking Area).

"RFID technology is an important new tool that will help our community pharmacists ensure the safety and authenticity of the products they

Bibliografický záznam

The screenshot shows the Academic Journals Database website. The browser address bar displays the URL: http://journaldatabase.info/articles/effects_internet_use_cell_phones.html. The page title is "The Effects of Internet Use, Cell Phones and Computer Games on Mental Health of Children and Adolescents". The author is Meral Kelleci. The journal is TAF Preventive Medicine Bulletin, ISSN 1303-734X. The volume is 7, issue is 3, start page is 253, and the date is 2008. There are buttons for "VIEW PDF", "DOWNLOAD PDF", and "Original page". The keywords are: interned_use, computer_games, _cell_phones, children and adolescent, mental health. The abstract is: "The use of digital technology, including computers, cell phones, computer games, and so on, most recently, on-the-go for recreational purposes, has increased among our youth over the past 15 years. Children and adolescent between the ages of 8 to 18 years spend an average of 5-6 hours per day using information and communication technologies. It is a useful progress because of the increase of internet usage which is unlimited, uncontrolled and uninhibited and easiness which arrival all sorts of to informations or persons but this state can cause to some important negative results too. The computer games, the internet explores is gradually estrange from social life the children and adolescent. In this paper, has been mentioned to negative effect of internet usage, computer games on mental health of children and adolescents. [TAF Prev Med Bull. 2008; 7(3): 253-256]". On the right side, there is a red box around the "ADD TO MY LIST" button. A red arrow points from this button to a "My list" sidebar on the right. The "My list" sidebar contains a list of items: "Immersive Historicity in World War II Digital Games", "Playing at bullying: The postmodern ethic of Bully (Canis...", "Digital games and second language acquisition in Asia", and a "Download the list" link. Below the "My list" sidebar, there is a section titled "You may be interested in:" with a link "How to make a website bring you clients?".

ABSTRACT
The use of digital technology, including computers, cell phones, computer games, and so on, most recently, on-the-go for recreational purposes, has increased among our youth over the past 15 years. Children and adolescent between the ages of 8 to 18 years spend an average of 5-6 hours per day using information and communication technologies. It is a useful progress because of the increase of internet usage which is unlimited, uncontrolled and uninhibited and easiness which arrival all sorts of to informations or persons but this state can cause to some important negative results too. The computer games, the internet explores is gradually estrange from social life the children and adolescent. In this paper, has been mentioned to negative effect of internet usage, computer games on mental health of children and adolescents. [TAF Prev Med Bull. 2008; 7(3): 253-256]

A Tale of the Cold War: Jews, Catholics, and Black Market Babies*
Authors: *Greene N.*
Pages: 131 - 159
Abstract: Memories of the Cold War are virtually inseparable from those of several trials and Congressional hearings that took place around 1950. Following one another in rapid succession, all reflected, and fueled, what has been called the Great Fear of the era. But concerns and targets varied. Some—like the trials of Alger Hiss (1950) and of Julius and Ethel Rosenberg (1951)—were focused on spies and spying; others—like the hearings launched in the late 1940s by HUAC (the House Committee on Un-American Activities) and those held by the Tydings Committee (1951)—were designed to root out subversion in worlds as diverse as those of entertainment and the State Department. In a somewhat different vein, the Congressional hearings led in 1950–1951 by Senator Estes Kefauver of Tennessee were charged with investigating the role of organized crime in America. Speaking of the gangsters who paraded before Kefauver and his committee, in a vivid passage Eric F. Goldman writes that the televised hearings, with their parade of endless “shadowy figures that obviously controlled so much, catalyzed the whole vague feeling that corruption was moving through all American life like a swarm of maggots.”¹¹

The British Library – pokročilé vyhledávání

http://explore.bl.uk/primo_library/libweb/action/search.do?mode=Advanced&ct=AdvancedSearch&dscnt=0&dsmtp=1392060016325&vid=BLVU1

The screenshot shows the British Library's advanced search interface. At the top, there's a navigation bar with links like 'Catalogues', 'Collections', 'Discover', 'Services', 'Visiting', 'About', and 'Information for...'. Below this is a large red banner with the text 'Explore the British Library'. Under the banner, there are links for 'Explore Home', 'Feeds', 'My Reading Room Requests', and 'Help'. The main search area is on the left, featuring a 'Main catalogue' section with an 'Advanced search' option. Below this, there are three search input fields, each with a dropdown menu set to 'Anywhere' and a button labeled 'AND'. The 'Material type:' dropdown is currently open, showing a list of categories: 'All items', 'Archived Websites', 'Articles' (highlighted in blue), 'Audio', 'Books', 'Databases', 'Images', 'Issues', 'Journals', 'Maps', 'Moving Images', 'Newspapers', 'Reports', 'Research Datasets', 'Scores', 'Theses', and 'Web Pages'. Below the search fields, there are 'Start Date:' and 'End Date:' labels with 'Year' input boxes. The 'Search scope:' dropdown is set to 'Everything in this catalogue'. At the bottom, there are three buttons: 'Search' (red), 'Clear' (red), and 'Simple search' (blue). A red warning message at the bottom states: 'Date range searching is not available for Article, Issue and Archived Website records; nor does it work for Audio records.'

Epidemiological Paradox or Immigrant Vulnerability? Obesity Among Young Children of Immigrants

Elizabeth H. Baker^{1,3}, Michael S. Rendall^{2,3},
Margaret M. Weden³

Published online: 26 June 2015
© Population Association of America 2015

Abstract According to the "immigrant epidemiological paradox," immigrants and their children enjoy health advantages over their U.S.-born peers—advantages that diminish with greater acculturation. We investigated child obesity as a potentially significant deviation from this paradox for second-generation immigrant children. We evaluated two alternate measures of mother's acculturation: age at arrival in the United States and English language proficiency. To obtain sufficient numbers of second-generation immigrant children, we pooled samples across two related, nationally representative surveys. Each included measured (not parent-reported) height and weight of kindergartners. We also estimated models that alternately included and excluded mother's pre-pregnancy weight status as a predictor. Our findings are opposite to those predicted by the immigrant epidemiological paradox: children of U.S.-born mothers were less likely to be obese than otherwise similar children of foreign-born mothers; and the children of the least-accultured immigrant mothers, as measured by

Abstract

Can welfare sanctions and the right to a subsistence minimum coexist? The present article sheds light on this question by examining recent developments in German social assistance law and placing them in the broader international legal context. In November 2019, the German Constitutional Court declared a large portion of the applicable regime unconstitutional because it violated the basic right to a guaranteed subsistence minimum. The first part of the article examines this German basic right and the way its normative requirements are applied by the Constitutional Court to welfare sanctions. Two important points of reference which are discussed relate to the effectiveness of the measures and the availability of sanction mitigation instruments that safeguard the constitutionally guaranteed subsistence minimum. The second part of the article carries out a similar examination into the international human right to

Abstract

Can welfare sanctions and the right to a subsistence minimum coexist? The present article sheds light on this question by examining recent developments in German social assistance law and placing them in the broader international legal context. In November 2019, the German Constitutional Court declared a large portion of the applicable regime unconstitutional because it violated the basic right to a guaranteed subsistence minimum. The first part of the article examines this German basic right and the way its normative requirements are applied by the Constitutional Court to welfare sanctions. Two important points of reference which are discussed relate to the effectiveness of the measures and the availability of sanction mitigation instruments that safeguard the constitutionally guaranteed subsistence minimum. The second part of the article carries out a similar examination into the international human right to social assistance and the respective case law of the international supervisory bodies. A comparative legal analysis is carried out in the third part, which highlights the similarities between the German and the international legal approach to minimum social protection and welfare sanctions. The article concludes with the observation that welfare sanctions and the right to a subsistence minimum can only coexist under the condition that states respect the absolute nature of minimum social protection and reconcile the adopted measures with the primary objective of social assistance.

Search tips

[See full details on the SAGE Journals search functionality](#), or review the following brief tips.

Boolean searches

You can use the Boolean Operators AND, OR, and NOT within search fields. By default, an AND relationship is assumed between search terms unless another operator is specified.

Searching for authors

To search for multiple authors, separate each author name with either AND or OR. Using AND will search for content that has been co-authored by the authors. Using OR will search for content that has been authored by either of the authors.

Abstract

Nutrition plays a crucial role in the pathophysiology and management of peripheral arterial disease (PAD) and periodontal disease (PD). As PD can have profound effects on an individual's functional ability to eat and can affect nutrient intake, we aimed to evaluate the role of PD severity on dietary intake (DI) and quality in PAD patients and compare it with current dietary recommendations for CVD. PD stages of 421 consecutive PAD patients were determined according to a standardised basic periodontal examination (Periodontal Screening and

ABSTRACT

The use of chemical agents for terrorist attacks or military warfare is a major concern at the present time. Chemical agents can cause significant morbidity, are relatively inexpensive, and are easy to store and use. Weaponization of chemical agents is only limited by the physicochemical properties of some agents. Recent incidents involving toxic industrial chemicals and chemical terrorist attacks indicate that critical care services are frequently utilized. For obvious reasons, the critical care literature on chemical terrorism is scarce. This article reviews the clinical aspects of diagnosing and treating victims of chemical terrorism while emphasizing the critical care management. The intensivist needs to be familiar with the chemical agents that could be used in a terrorist attack. The military classification divides agents into lung agents, blood agents, vesicants, and nerve agents. Supportive critical care is the cornerstone of treatment for most casualties, and dramatic recovery can occur in many cases. Specific antidotes are available for some agents, but even without the antidote, aggressive intensive care support can lead to favorable outcome in many cases. Critical care and emergency services can be

Search help

Exact match supported for author search results

You can perform an exact author search by enclosing the name (first and/or last) of the author in quotation marks.

Boolean operators

The Boolean operators AND, OR, and NOT can be applied to search terms.

AND (also + or &)

Use AND to search for documents containing two or more terms. For example, the following query returns documents containing both cat and dog:

cat AND dog

The AND operator is applied by default; for example cat AND dog produces the same results as cat dog.

OR

Use OR to search for documents containing at least one of two or more terms. For example, the following query returns documents containing cat, documents containing dog, and documents containing cat and dog:

cat OR dog

Abstract

The purpose of this article is to revive academic discussion about the potential of Islamic norms to affect State policy with regard to weapons of mass destruction. A number of religious norms govern just warfare (*jus in bello*). Yet, the extension of such norms to weapons of mass destruction, let alone their effect on State policy, has been under-researched not only by Western scholars but also by Islamist ethicists. This case study sets out to discuss different contextual aspects of the role played by religion in Iranian decision-making in relation to chemical weapons during the Iran-Iraq War (1980–1988). Iran constitutes a *sui generis* case when it comes to evaluating the power of religious norms to affect policy. This is due to religion's major role in the society's cultural and constitutional structure. Iraq started using chemical weapons ('CW') against Iran in 1982 and continued to do so through the war. Iran did not respond in kind, initially. Religious norms played a role in Iran's restraint, but their compliance pull was not absolute. A number of internal factors resulted in the religious prohibitions as well as a number of grand jurists (*marāji'i taqlid*) being sidelined, which paved the way for some CW use and development by Iran. External factors also played a part when

Search Tips

You can use the Boolean operators AND (also + or &), OR and NOT (also -) within search fields. These operators must be entered in UPPERCASE to work.

If more than one term is entered, and no operators are specified, terms are searched using AND. To search for a phrase, put the terms in quotes. For example, *spinal cord* searches spinal AND cord while "*spinal cord*" finds this exact phrase.

Wildcards

Use a question mark (?) in a search term to represent a single character (*wom?n* finds women or woman). Use an asterisk (*) to represent zero or more characters. For example, *plant** finds all words with that root (plant, plants, & planting) while *an*mia* finds variants with one or more letters (anemia & an~~a~~emia). Wildcards CANNOT be used at the start of a search term (**tension*) or when searching for phrases in quotes ("*tobacco smok**").

Author Search

Author names may appear with full first names or just initials. Place author names in quotes to find a specific name and its variants. For example, "John Smith" finds articles by John Smith, John K Smith and John Colby-Smith while "J Smith" finds articles by J Smith, JD Smith, John Smith and Julia

Abstract

Successfully developing a new product, commercial purposes involves complex and dynamic conditions of knowledge management that fosters innovation, which knowledge is created and exploited in the and source of innovation capabilities. The objective of the study is to examine the relationship between conditions of knowledge management and innovation capability. The sample consists of 102 Colombian new technology-based firms. According to results, conditions of knowledge management has a positive effect on innovation capability.

SEARCH TIPS

Boolean searches

You can use the Boolean Operators AND, OR and NOT within search fields. By default an AND relationship is assumed between search terms unless another operator is specified.

Searching for authors

To search for multiple authors, separate each author name with either AND or OR. Using AND will search for content that has been co-authored by the authors. Using OR will search for content that has been authored by either of the authors.

Searching for phrases

Enclose your search term with quotation marks to search for an exact match of that phrase. Without quotation marks, articles including all of the search terms somewhere in the article will be listed. For example searching for "civil war" will find articles containing that exact phrase.

Wildcards

Project MUSE

<https://muse.jhu.edu/>

- Zaměřen na humanitní a sociální vědy, umění a lékařství.
- Zpřístupňuje literaturu od 300 neziskových vydavatelů (univerzity, výzkumné organizace).
- Některé dokumenty jsou volně přístupné.

Seznam knih a časopisů s otevřeným přístupem:

<https://about.muse.jhu.edu/muse/open-access-overview/>

- Pokrývá 800 časopisů a 80 000 knih od 125 vydavatelů od r. 1995.

The Fatimid Holy City:

Rebuilding Jerusalem in the Eleventh Century

Jennifer Pruitt — (bio)

Abstract

This essay explores the architectural history of Jerusalem in the Abbasid (751–970) and Fatimid (970–1036) periods. Compared to the time of the Umayyads (661–750), Abbasid-era Jerusalem was characterized by a caliphal disinterest in the monuments of the holy city. However, it also saw growth in the identification between local populations and their respective religious monuments. This contest over sacred space culminated under the Fatimid dynasty, in the cataclysmic reign of al-Hakim bi-Amr Allah (r. 985–1021), who is infamous today because he called for the destruction of the Holy Sepulchre. Indeed, al-Hakim's incursion into the city was predominantly destructive. Nevertheless, his attention to the city would have productive results for eleventh-century Jerusalem. His successor, al-Zahir, was deeply invested in renovating the structures of the Haram al-Sharif, ushering in a chapter of architectural patronage and a resurgence of imperial interest in the structure. This essay argues that this patronage was carried out with the goal of undoing the excesses of al-Hakim's reign. In al-Zahir's reimagining of the sacred space, the platform's architecture emphasized the orthodox Islamic tales of the Prophet's night journey (*isrāʾ*) and ascension to heaven (*miʾrāj*), in direct contrast to the perceived heresies of the later years of al-Hakim's reign.

ANTICKÉ POZNÁVANIE DUNAJA OD 8. STOROČIA PRED N. L. DO 1. STOROČIA N. L.
Michal Habaj
Danube. Antiquity. Ancient geography. Herodotos. Augustus.

The **Danube** was one of the most important rivers in ancient geography. Its upper and middle course divided the Romans from the tribes to the north, while its lower course separated the Greek world from the Scythians. In ancient thought it was not only a real natural barrier, but also the boundary of the oikumené, the meeting place between the civilized world and the mythical north. The study considers the phases of the process of discovering the **Danube** from its first mentions until Augustus, when its whole length was known as a result of Roman expansion. The whole process of exploration is evaluated on the basis of ancient sources, epigraphy and archaeological finds. Relevant events are mentioned, and the sources of various ideas and traditions are analysed.

Prediction and Judgment: Why Artificial Intelligence Increases the Importance of Humans in War

Avi Goldfarb, Jon R. Lindsay

Abstract

Recent scholarship on artificial intelligence (AI) and international security focuses on the political and ethical consequences of replacing human warriors with machines. Yet AI is not a simple substitute for human decision-making. The advances in commercial machine learning that are reducing the costs of statistical prediction are simultaneously increasing the value of data (which enable prediction) and judgment (which determines why prediction matters). But these key complements – quality data and clear judgment – may not be present, or present to the same degree, in the uncertain and conflictual business of war. This has two important strategic implications. First, military organizations that adopt AI will tend to become more complex to accommodate the challenges of data and judgment across a variety of decision-making tasks. Second, data and judgment will tend to become attractive targets in strategic competition. As a result, conflicts involving AI complements are likely to unfold very differently than visions of AI substitution would suggest. Rather than rapid robotic wars and decisive shifts in military power, AI-enabled conflict will likely involve significant uncertainty, organizational friction,

MIT Open Access Articles

The MIT Open Access Articles collection consists of scholarly articles written by MIT-affiliated authors that are made available through DSpace@MIT under the MIT Faculty Open Access Policy, or under related publisher agreements. Articles in this collection generally reflect changes made during peer-review.

Version details are supplied for each paper in the collection:

- Original manuscript: author's manuscript prior to formal peer review
- Author's final manuscript: final author's manuscript post peer review, without publisher's formatting or copy editing
- Final published version: final published article, as it appeared in a journal, conference proceedings, or other formally published context (this version appears here only if allowable under publisher's policy)

Some peer-reviewed scholarly articles are available through other DSpace@MIT collections, such as those for departments, labs, and centers.

Carbon Nanotube Formic Acid Sensors Using a Nickel Bis(ortho-Diiminosemiquinonate) Selector

Lin, Sibö; Swager, Timothy M (American Chemical Society (ACS), 2018-02)

Formic acid is corrosive, and a sensitive and selective sensor could be useful in industrial, medical, and environmental settings. We present a chemiresistor for detection of formic acid composed of single-walled carbon ...

Selecting ultra-faint dwarf candidate progenitors in cosmological N-body simulations at high redshifts

Abstract
We consider the noisy thermal amplifier channel, where signal modes are amplified together with environmental thermal modes. We focus on the secret-key capacity of this channel, which is the maximum amount of secret bits that two remote parties can generate by means of the most general adaptive protocol, assisted by unlimited and two-way classical communication. For this channel only upper and lower bounds are known, and in this work we improve the lower bound. We consider a protocol based on squeezed states and homodyne detections, in both direct and reverse reconciliation. In particular, we assume that trusted thermal noise is mixed on beam splitters controlled by the parties in a way to assist their homodyne detections. The new improved lower bounds to the secret-key capacity are obtained by optimizing the key rates over the variance of the trusted noise injected, and the transmissivity of the parties' beam splitters. Our results confirm that there is a separation between the coherent information of the thermal amplifier channel and its secret key capacity.

DSpace@MIT – digitální repozitář

Základní vyhledávání: <https://dspace.mit.edu/>

The screenshot shows the DSpace@MIT homepage. At the top, there's a browser window with the URL <https://dspace.mit.edu/>. The page header includes navigation links: Soubor, Úpravy, Zobrazit, Oblíbené položky, Nástroje, and nápověda. The main content area features the DSpace@MIT logo and a description: "DSpace@MIT is a digital repository for MIT's research, including peer-reviewed articles, technical reports, working papers, theses, and more." Below this is a search bar with the text "Earth structure*" and a "Search" button. To the right, there's a "BROWSE" section with a search bar and a list of categories: All of DSpace, Communities & Collections, By Issue Date, Authors, Titles, and Subjects. Further down, there are three columns: "Browse by" (Communities & collections, Issue date, Authors, Titles, Subjects), "Browse collections" (MIT Open Access Articles, MIT Theses, Sloan School of Management, MIT OpenCourseWare, Computer Science and Artificial Intelligence Laboratory, Research Laboratory for Electronics, Laboratory for Information and Decision Systems, and a "View all collections" link), and "Get help" (Deposit to an existing collection, Deposit to the MIT Open Access Collection, Learn more about depositing work at DSpace@MIT, Get help with DSpace@MIT, and a "My account" button). On the right side, there's a "MY ACCOUNT" section with a "Login" button and a "STATISTICS" section with links to OA Statistics, Statistics by Country, and Most Popular Departments.

DSpace@MIT

DSpace@MIT is a digital repository for MIT's research, including peer-reviewed articles, technical reports, working papers, theses, and more.

AFRICAN JOURNALS ONLINE (AJOL) JOURNALS SEARCH USING AJOL RESOURCES

African Journals Online

Welcome to AJOL!

Researchers and policy-makers need access to contextually-relevant quality research publications from Africa in order to develop solutions to address the continent's challenges in health, education, climate change & under-development.

African Journals OnLine (AJOL) is the world's largest and preeminent platform of African-published scholarly journals. **AJOL is a Non-Profit Organisation that (since 1998) works to increase global & continental online access, awareness, quality & use of African-published, peer-reviewed research.** Millions of monthly downloads by site users from nearly every country in the world are an indication of the need and widespread use of the AJOL initiative. More than half of the repeat users are from Africa.

AJOL hosts **526 Journals**
including **264 Open Access Journals**

The site has **14 927 Issues**
containing **181 052 Abstracts**.

There are **174 916 Full Text Articles** for download
of which **114 449** are **Open Access**

HOW TO USE AJOL:

- [Journal Quality](#)
- [More about AJOL](#)
- [AJOL's Partners](#)
- [Terms and Conditions of Use](#)
- [Contact AJOL](#)

Since 1998, AJOL has been working for **African research to contribute to African development** by:

- Massively increasing global visibility of [partner journals](#) (AJOL is NOT a publisher, we are a journal aggregator platform - millions of site visits from all over the world)
- Massively increasing global access to research published in African journals (millions of article downloads each month via AJOL)
- Massively increasing African readership of African research
- Quality, cost-saving (free) technical services to African-published journals to help their financial sustainability

AJOL is a non-profit, relying on your support.

Solid Waste Management in Nairobi, Kenya. A case for emerging economies.

Max Muniafu
United States International University Kenya

Everylyne Otiato

Abstract

Industrialization and globalization have increased the quantity and quality of goods that are produced and moved around the world mainly through trade. This has led to an increased generation of waste since due to availability; items are discarded with no real attachment or need for repair. Improved quality has seen the use of materials, which are either synthetic or not common in high concentrations in nature's living life cycles and thus are potentially hazardous when released from consumer products into the environment. The question of what to do with human trash has been of concern to every society and over time, the concerned local authorities have set up waste collection and disposal systems. There are numerous reasons why we need to be concerned with waste. It is costly to dispose of, and the generation of large amounts of wastes impacts the environment. Domestic and industrial discharges of waste contaminate air, land and water with pollutants and toxics that can harm human and animal health and plant life. Waste technologies must therefore grow hand in hand with changing societal complexities to cope with the high volumes and

SEARCH TIPS

Boolean searches

You can use the Boolean Operators AND, OR and NOT within search fields. By default an AND relationship is assumed between search terms unless another operator is specified.

Searching for authors

To search for multiple authors, separate each author name with either AND or OR. Using AND will search for content that has been co-authored by the authors. Using OR will search for content that has been authored by either of the authors.

Searching for phrases

Enclose your search term with quotation marks to search for an exact match of that phrase. Without quotation marks, articles including all of the search terms somewhere in the article will be listed. For example searching for "civil war" will find

Abstract

This paper illustrates a comprehensive and systematic approach for the identification of new or emerging risks of chemicals (NERCs) for workers, consumers and the environment. The methodology illustrated here is composed of three steps: 1) signal identification; 2) signal evaluation and prioritisation and when necessary; 3) assessing follow-up actions for further risk management measures. During signal identification, new information with regard to adverse effects induced by
