

OA.mg a Internet Archive Scholar

Martina Machátová

Poslední aktualizace: 27. února 2026

OA.mg

<https://oa.mg/>

Vyhledávací nástroj akademických příspěvků a článků s otevřeným přístupem.

Pokrývá asi 250 milionů odborných článků a příspěvků.

OA.mg

Vyhledávací možnosti

Není k dispozici help.

Ze zkušeností vyplývá:

- Není nutné používat znaky pro rozšíření, systém sám hledá slova s různou koncovkou.
- Nefungují zde logické operátory.
- Mezera mezi zadanými výrazy znamená operátor AND.
- Lze zde používat oboustranné horní uvozovky pro frázi.

Penetration of Microplastics and Nanoparticles Through Skin: Effects of Size, Shape, and Surface Chemistry

Arianna Menichetti, Dario Mordini, Marco Montalti

Microplastics Penetration (warfare) Nanomedicine 2024

Download via PaperPanda **Full Text at Publisher** Access via your Institution Cite this on Citationsy Open in Google Scholar Visualize on Litmaps

Skin represents an effective barrier against the penetration of external agents into the human body. Nevertheless, recent research has shown that small particles, especially in the nanosized range, can not only penetrate through the skin but also work as vectors to transport active molecules such as contrast agents or drugs. This knowledge has opened new perspectives on nanomedicine and controlled drug delivery. On the other hand, micro- and nanoplastics represent a form of emerging pollutants, and their concentration in the environment has been reported to drastically increase in the last years. The possible penetration of these particles through the skin has become a major concern for human health. If the actual primary toxicity of these materials is still debated, their possible role in the transport of toxic molecules through the skin, originating as secondary toxicity, is surely alarming. In this review paper, we analyze and critically discuss the most recent scientific publications to underline how these two processes, (i) the controlled delivery of bioactive molecules by micro- and nano-structures and (ii) the unwanted and uncontrolled penetration of toxic species through the skin mediated by micro- and nanoparticles, are deeply related and their efficiency is strongly affected by the nature, size, and shape of the particles.

Cesta k záznamu a případně i k plnému textu

The screenshot shows the OA.mg website interface. At the top, there is a dark blue header with the OA.mg logo on the left, a search bar in the center with the text "Search for Papers or Authors", and buttons for "Log in" and "Create a Free Account" on the right. Below the header, the main content area is white. On the left side of the main area, there is a red rectangular box highlighting a text input field containing the DOI "10.1116/1.2815690". To the right of this box, there is a light blue callout box with the text "Organise your papers into different lists or save them to read later with a free account." and a button labeled "Save this Paper". Below the DOI input field, there is a section for citation styles with tabs for "Cite this:", "MLA", "APA", "Chicago", "IEEE", "Harvard", and "BibTeX". A button labeled "Generate Citation" is located below these tabs. At the bottom right of the main content area, there is a small grey box with the text "Powered by Citationsy*". At the bottom left, there is a small blue circular logo. At the bottom center, there is a line of small text: "is a paper by published in .You can read and download a PDF Full Text of this paper here."

Hledání podle jmen autorů

The screenshot shows a web browser window with the OA.mg website. The browser's address bar displays the URL `oa.mg/authorsearch?search=Tomáš+Řepa`. The website's header is dark blue with the OA.mg logo on the left. In the center of the header is a search bar containing the text "Tomáš Řepa". To the right of the search bar are two buttons: "Log in" and "Create a Free Account". Below the search bar, there are two radio buttons: "Papers" and "Authors". The "Authors" button is selected and highlighted with a red square. To the right of the radio buttons, the text "Total Results: 3" is displayed. The main content area shows three vertical cards. The first card on the left is titled "14 works on OA.mg" and "Tomáš Řepa", with tags for "Political science", "Philosophy", and "History". The middle card is titled "1 works on OA.mg" and "Tomáš Řepa", with tags for "Field (mathematics)", "Political science", and "Mathematics". The third card on the right is titled "1 works on OA.mg" and "Tomáš Řepa", with a tag for "Mathematics".

Search Millions of Research Papers

This fulltext search index includes over 35 million research articles and other scholarly documents preserved in the Internet Archive. The collection spans from digitized copies of eighteenth century journals through the latest Open Access conference proceedings and preprints crawled from the World Wide Web. [More »](#)

Internet Archive Scholar Help

The screenshot shows the Internet Archive Scholar website interface. At the top, there's a browser window with multiple tabs. Below the browser, the website header includes navigation links like 'Vlastní odkazy', 'Importováno z apli...', and search options. The main content area displays a grid of article thumbnails. Each thumbnail includes a title, author, year, and journal. A red arrow points to the article titled 'ブドウサンショウ抽出物の抗SARS-CoV活性' by Takaaki Maeda, et al., published in 2011 in Horticultural Research (Japan).
