TITLE: Electronic game-of-chance device

Application Number	93118361	Application Date	1993.09.30
Publication Number	1086455	Publication Date	1994.05.11
Priority Information	FR92132391992/11/4		
International Classification	A63F9/24;G07C15/00		
Applicant(s) Name	Into Telecom		
Address			
Inventor(s) Name	Jean-Michel Reibel;Pierre-Luc Simon;Eric Bigonneau		
Patent Agency Code	31100	Patent Agent	ZHU MIN

**Abstract**

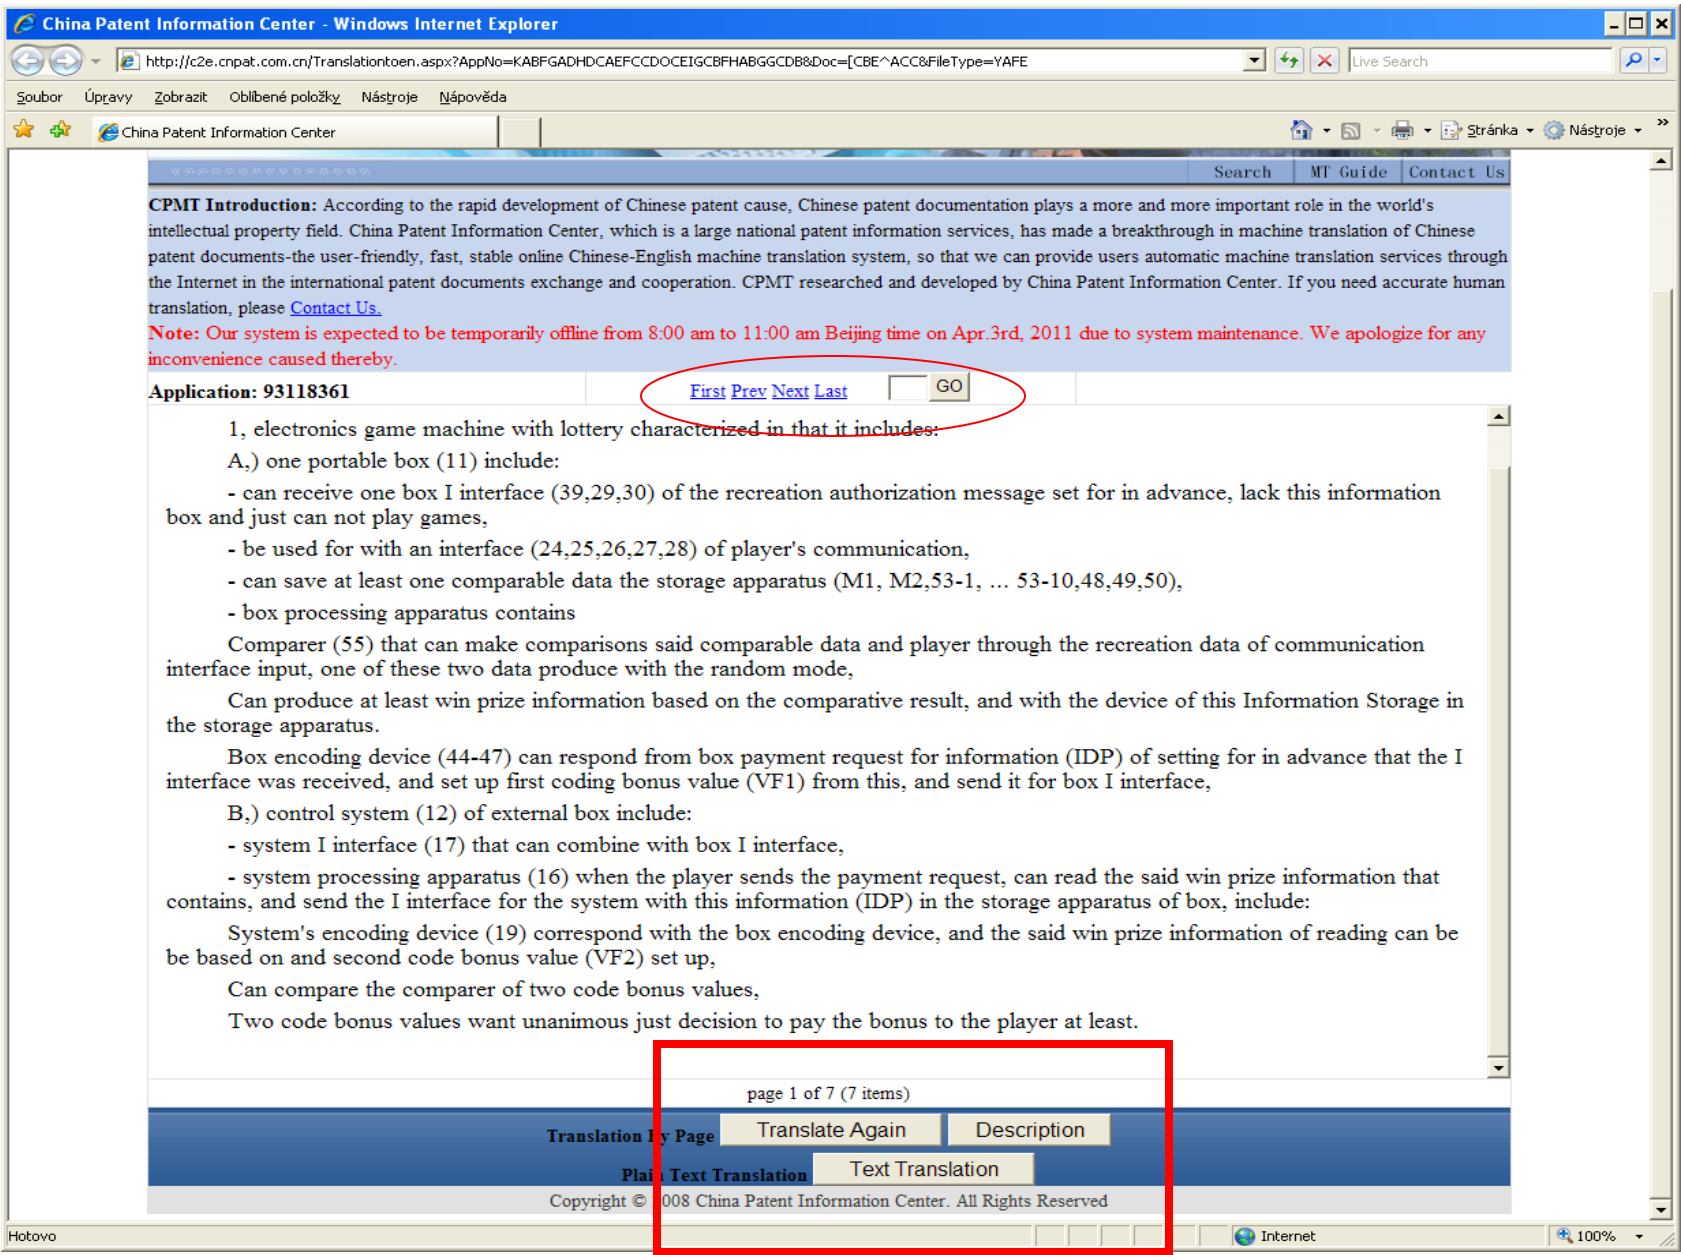

A portable box comprises memory able to store at least one item of reference data, and a comparator able to compare the said reference data item with an item of game data. The box encryption structure are able to establish a first encrypted win value from the said win information item. The system comprises a system input/output interface, and system processing structure, able, in the presence of a payment request originating from the player, to read the said win information item contained in the memory of the box. System encryption structure, counterparts of the box encryption structure, establish a second encrypted win value from the said win information item read. The actual payment of the win to the player is conditioned by agreement of the two encrypted win values.

**CPMT Introduction:** According to the rapid development of Chinese patent cause, Chinese patent documentation plays a more and more important role in the world's intellectual property field. China Patent Information Center, which is a large national patent information services, has made a breakthrough in machine translation of Chinese patent documents-the user-friendly, fast, stable online Chinese-English machine translation system, so that we can provide users automatic machine translation services through the Internet in the international patent documents exchange and cooperation. CPMT researched and developed by China Patent Information Center. If you need accurate human translation, please [Contact Us](#).

**Note:** Our system is expected to be temporarily offline from 8:00 am to 11:00 am Beijing time on Apr.3rd, 2011 due to system maintenance. We apologize for any inconvenience caused thereby.

**Application:** 93118361

[First](#) [Prev](#) [Next](#) [Last](#)

1, electronics game machine with lottery characterized in that it includes:  
A.) one portable box (11) include:  
- can receive one box I interface (39,29,30) of the recreation authorization message set for in advance, lack this information box and just can not play games,  
- be used for with an interface (24,25,26,27,28) of player's communication,  
- can save at least one comparable data the storage apparatus (M1, M2,53-1, ... 53-10,48,49,50),  
- box processing apparatus contains  
Comparator (55) that can make comparisons said comparable data and player through the recreation data of communication interface input, one of these two data produce with the random mode,  
Can produce at least win prize information based on the comparative result, and with the device of this Information Storage in the storage apparatus.  
Box encoding device (44-47) can respond from box payment request for information (IDP) of setting for in advance that the I interface was received, and set up first coding bonus value (VF1) from this, and send it for box I interface,  
B.) control system (12) of external box include:  
- system I interface (17) that can combine with box I interface,  
- system processing apparatus (16) when the player sends the payment request, can read the said win prize information that contains, and send the I interface for the system with this information (IDP) in the storage apparatus of box, include:  
System's encoding device (19) correspond with the box encoding device, and the said win prize information of reading can be based on and second code bonus value (VF2) set up,  
Can compare the comparer of two code bonus values,  
Two code bonus values want unanimous just decision to pay the bonus to the player at least.

Abstract\_EN:

Real world interactive role playing games ("RWIRPG") is a new intellectual property aimed at revolutionizing the gaming industry. No longer will gamers be forced to stay inside in order to play and socialize with other gamers. The embodiments of the invention are aimed at creating an interactive "real world" gaming experience, placing a new emphasis on human interaction in order to advance electronic gaming. Utilizing the latest GPS/GPRS mapping technology and software, RWIRPG would be location-aware of the player and any other players of any particular game. Once two or more players of a particular game are within a predetermined radius of each other, that game would allow them to dir
