CNKI Scholar

<http://eng.scholar.cnki.net/>

<https://enscholar.cnki.net/>

- Čínský portál pro vyhledávání různých informačních zdrojů.
- Poskytuje metadata asi od 700 vydavatelů ze 65 zemí.
- Obsahuje asi 100 milionů záznamů článků ze 73 000 časopisů.
- Lze využít překladač z čínštiny do češtiny či angličtiny.
- Je nutné ukládat vybrané záznamy z každé stránky zvlášť.

CNKI Scholar

Vyhledávací možnosti - omezení

- Nápověda v angličtině není k dispozici.
- Nejsou přeloženy všechny výrazy do angličtiny, a to ani ve vyhledávací masce, ani u zpřesňujících nabídek (filtry, fasety), nelze tedy využít všechna zpřesňující kritéria.

CNKI Scholar

Zkušenosti s vyhledávacími možnostmi

- Lze používat hvězdičku pro rozšíření.
- V základní vyhledávací masce pravděpodobně fungují oboustranné horní uvozovky pro frázi.
- Není jisté správné fungování logických operátorů, i když systém najde výsledky.
- Tematické vyhledávání v pokročilé rešeršní masce zahrnuje vyhledávání v názvu, v klíčových slovech a v abstraktu.
- V pokročilém vyhledávání vede „exact“ i „fuzzy“ hledání ke stejným výsledkům.

Abstract / 摘要

Credit and credit-based transactions underlie the financial system. After decades of development, artificial intelligence and machine learning have brought new momentum to the credit scoring model. In this study, a novel multi-stage ensemble model with enhanced outlier adaptation is proposed to achieve good predictive power for credit scoring. To reduce the adverse effects of outliers existing in the noise-filled credit datasets, a local outlier factor algorithm is enhanced with the bagging strategy to effectively identify outliers and subsequently boost them back into the training set to construct an outlier-adapted training set that enhances the outlier adaptability of base classifiers. To improve the feature interpretability, a new dimension-reduced feature transformation method is proposed to hierarchically evolve features and extract salient features. To further strengthen the predictive power of the proposed model, a stacking-based ensemble learning method with self-adaptive parameter optimization is proposed to optimize the parameters of selected base classifiers automatically and then to construct a stacking-based multi-stage ensemble model. Ten datasets are tested with six evaluation

Hledání časopisů: <https://enscholar.cnki.net/journal/search>

The screenshot displays the CNKI Scholar website interface. At the top, there's a browser window with multiple tabs, including 'Moravská zemská knihovna', '搜 外文检索-中国知网', '搜 外文期刊导航', and 'What drives investment deci...'. The address bar shows 'enscholar.cnki.net/journal/search'. Below the browser window, the website header includes navigation links like '中国知网', '手机版', 'English', '帮助中心', '机构登录', '个人登录', '注册新用户', '我的CNKI', and 'newsletter'. The main header features the CNKI logo and the text 'WORLD OF CNKI CNKI OF WORLD'. On the right, there are tabs for 'Platforms' and 'Journals'. The main content area has a search bar with a dropdown menu showing 'TITLE', 'PLATFORM', 'PUBLISHER', and 'ISSN/EISSN'. The search term 'Environmental Management' is entered. Below the search bar, there's a section titled 'Journals > Discipline' with a 'Subject' sidebar. The sidebar lists various subjects: '医学 (23230)', '自然科学 (15832)', '社会科学 (15790)', '工程技术 (11487)', '人文学科 (7242)', and '农业科学 (2662)'. The main content area displays an introduction in Chinese and English. The English text states: 'International journals indexed by CNKI are over 73 thousands of titles containing 100 million records, overlapping with JCR and Scopus listed titles respectively at 94% and 80%. All content are unified under seven disciplines of natural science, engineering technology, medical, agricultural science, social science, humanities, and philosophy. Information at journal pages consists of title, ISSN or eISSN, pub frequency, initial year, publisher, subject, pub location, language, etc. Article view pages offer readers with abstract-based information and links directing to publishers for full text access. Articles are sorted by volumes and issues as well as open access content are tabbed for hybrid journals. Archives are back to 1665 at the earliest. Enter>'
