# CORE

## Charakteristika

- Umožňuje přístup asi k 81 mil. dokumentů s otevřeným přístupem z 3659 repozitářů.
- Zachycuje téměř 6 000 časopisů s otevřeným přístupem.
- Pokrývá institucionální a předmětově orientované repozitáře a vydavatele periodik včetně několika repozitářů z ČR.
- Umožňuje přístup k dokumentům z celého světa ve 20 jazycích.

# CORE

## Vyhledávací možnosti (1)

Zjištěno praktickým zkoušením (není help):

- Mezera mezi slovy znamená operátor OR.
- Lze používat booleovské operátory AND a OR.
- Je nutné psát logické operátory velkými písmeny.
- Lze používat znaky pro pravostranné rozšíření:
  - \* náhrada za neomezený počet znaků,
  - ? náhrada za 1 znak.

# CORE

## Vyhledávací možnosti (2)

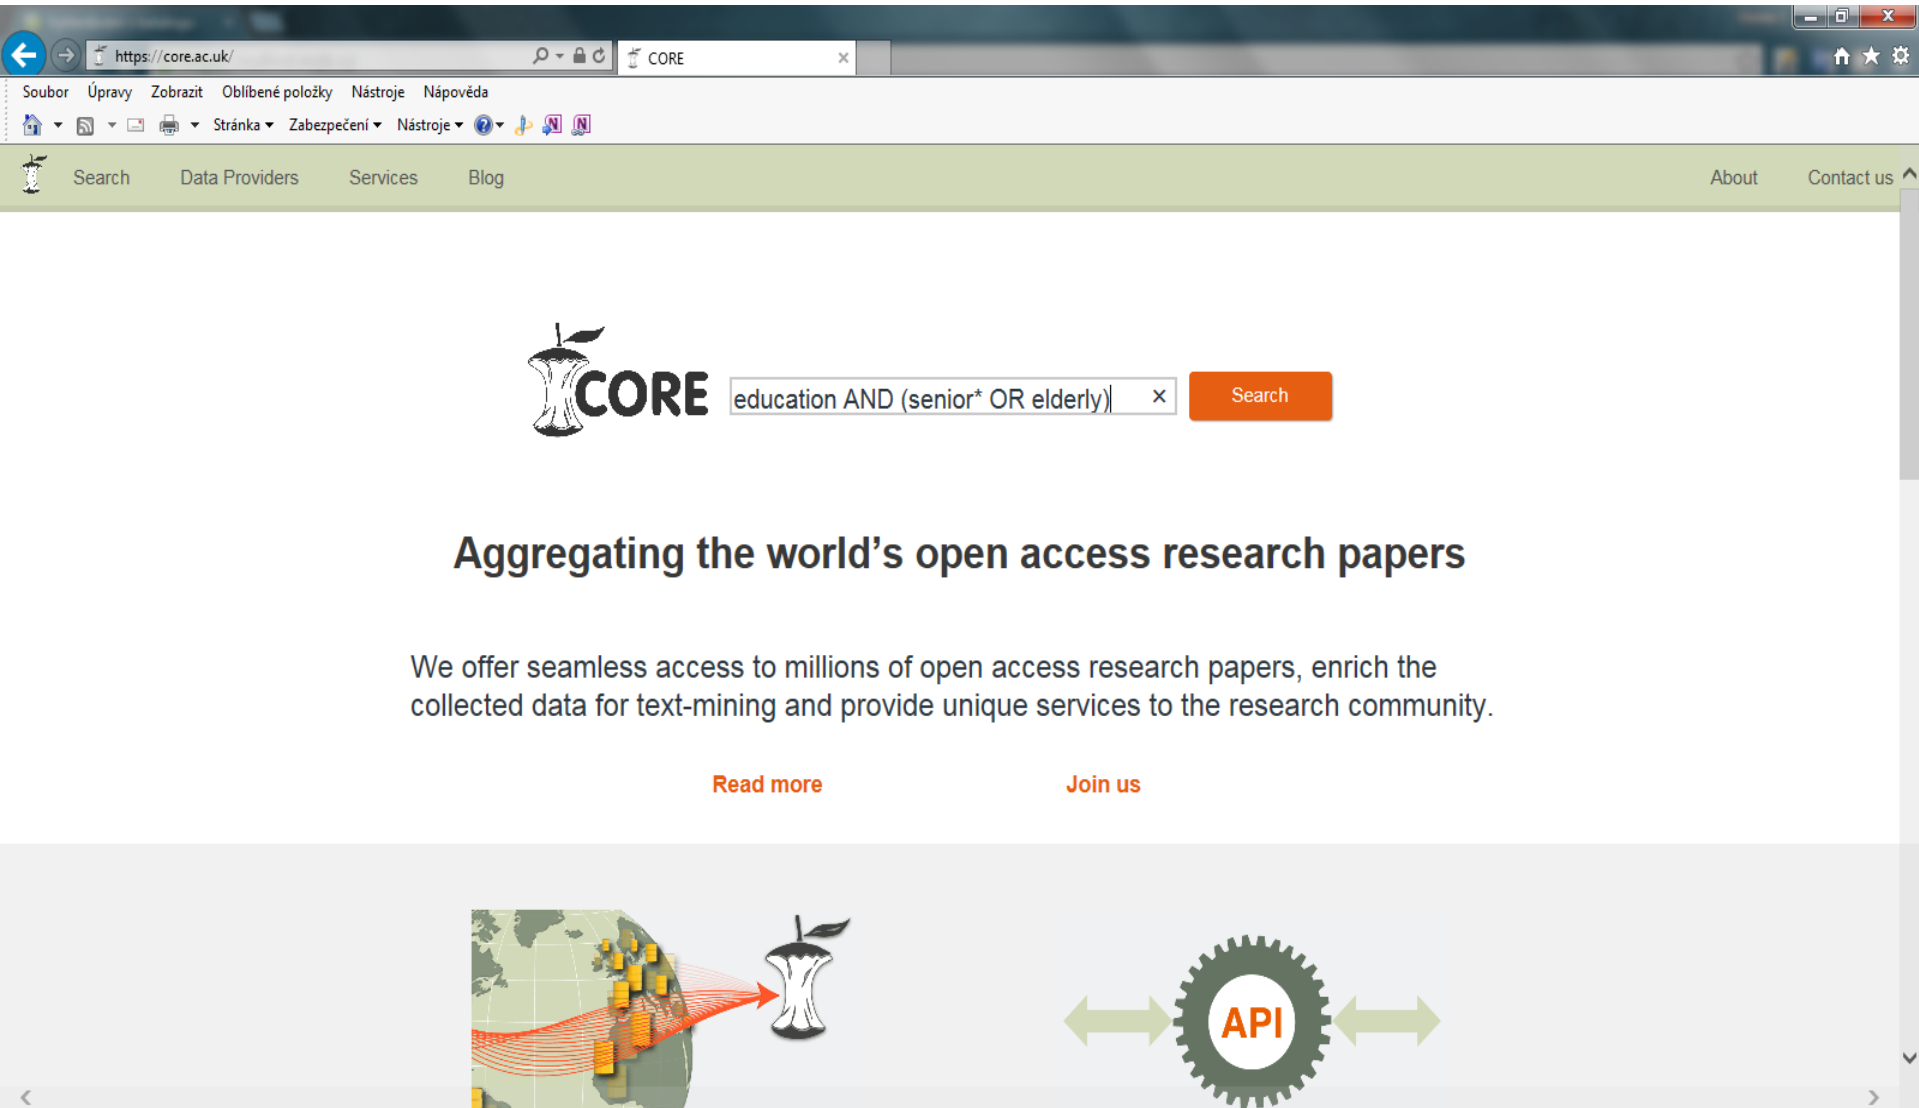

- Lze používat oboustranné horní uvozovky pro frázi.
- Zadávání dotazu při vylučování pojmů (operátor NOT) z vyhledávání:

*Příklad:*

*(icing) -sweet\**

## Standardní (základní) vyhledávání

The image shows a screenshot of a web browser displaying the CORE website. The browser's address bar shows the URL `https://core.ac.uk/`. The page features a navigation menu with links for Search, Data Providers, Services, and Blog. The main content area includes the CORE logo, a search bar containing the query `education AND (senior* OR elderly)`, and an orange Search button. Below the search bar, the text reads "Aggregating the world's open access research papers" and "We offer seamless access to millions of open access research papers, enrich the collected data for text-mining and provide unique services to the research community." Two buttons, "Read more" and "Join us", are positioned below the text. At the bottom, a diagram illustrates the data flow from a globe to the CORE logo and the API interface.

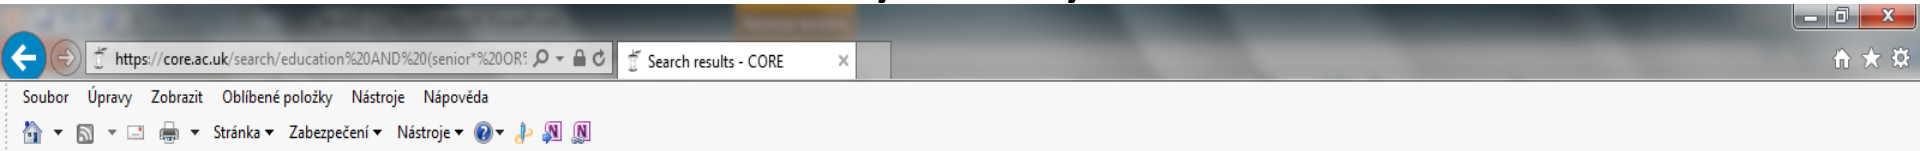

[Read more](#) [Join us](#)

The diagram at the bottom of the page illustrates the data flow. On the left, a globe with several server racks is shown, with red arrows pointing towards the CORE logo. To the right of the logo is a green gear with the text "API" inside it, and two green double-headed arrows pointing outwards from the gear, indicating connectivity or data exchange.

## Záznam

The screenshot shows a web browser window displaying a CORE record. The browser's address bar shows the URL <https://core.ac.uk/display/11889780>. The browser's menu bar includes 'Soubor', 'Úpravy', 'Zobrazit', 'Oblíbené položky', 'Nástroje', and 'Nápověda'. The browser's toolbar shows various icons for home, search, and settings. The main content area features a thumbnail of the article's cover page on the left, titled 'Uses of Digital Tools among the Elderly'. To the right of the thumbnail is a map of Europe with a green dot indicating the location of the repository. The article title 'Uses of Digital Tools among the Elderly' is prominently displayed, followed by the authors 'By Susana Agudo-Prado, María-Ángeles Pascual-Sevillana and Javier Fombona-Cadavieco'. Below the title is an 'Abstract' section containing a detailed summary of the research. Further down, there are sections for 'Topics', 'Publisher', 'Year', and 'OAI identifier'. A red box highlights a button labeled 'Get cached PDF (305 KB)'. At the bottom of the page, there is a preview of the article's first page, which includes the journal title 'INVESTIGACIONES / RESEARCH', the authors' names, and their location 'Oviedo (Spain)'. The browser's status bar at the bottom right shows a zoom level of 75%.

### Uses of Digital Tools among the Elderly

By Susana Agudo-Prado, María-Ángeles Pascual-Sevillana and Javier Fombona-Cadavieco

#### Abstract

A «multiage» society needs the design and creation of new areas of learning and communication to manage the digital demands of the elderly. In this article, the relation of the elderly to information and communication technologies (ICT) is approached and two objectives are considered: to discover the technological resources they use and to objectively describe the types of usage that senior citizens make of ICT. To that end, a survey technique is used, with the results validated by means of discussion groups. The study participants consisted of 215 elderly people, all ICT users, and 7 discussion groups of 5 people each. The results indicate that the resources most widely used by the elderly are computers and the Internet, and the type of usage is grouped into 4 categories: education, information, communication and entertainment. There were no significant differences in gender or age although differences were found in the availability of these resources for private use based on the level of education

**Topics:** CC. User categories: children, young people, social groups., L. Information technology and library technology
