Espacenet Vyhledávání

Espacenet: free access to over 130 million patent documents

Quick access

Espacenet Vyhledávací možnosti

- Je možné zadat nanejvýš 20 výrazů.
- Lze používat operátory AND, OR a NOT.
- Náhrady znaků:
 - * neomezená délka,
 - ? 0–1 znak,
 - # 1 znak.

Náhradní znaky nelze používat na začátku slov.

A helmet is described, more specifically a helmet comprising a protective shell (10) formed of a flexible experience performance (a) of matches more asia								

cavity for receiving the wearer's head, the shell being foldable, the helmet further comprising a strap (11) arrangement for fastening the shell to the wearer's head

2. Attachment system for frontal helmet extension to a helmet

AU2011312173A1 (B2) • 2013-05-02 • FOX HEAD INC

Earliest priority: 2010-10-05 • Earliest publication: 2012-04-12

...An attachment system for securing a frontal helmet extension to protective headgear, the attachment system including one or more magnetic elements disposed on the helmet and/or frontal helmet extension and one or more complementary elements disposed on the helmet... to detachably couple the frontal helmet extension to the helmet in a position wherein the frontal helmet extension extends forward ...

3. Reflecting material

US2007269669A1 (B2) • 2007-11-22 • HEADLIGHT HELMETS AB

Earliest priority: 1998-03-05 • Earliest publication: 1999-03-15

A method of manufacturing a retro-reflective shell having a curved or irregular surface for reflecting light in all directions from a laminated product, comprising a substantially flat sheet of a plastic material and a reflective layer on at least one side of said flat sheet plastic material. The reflective layer comprises a transparent adhesive substance and transparent glass or plastic pearls with a diameter between 0.01 and 0.05 mm. The substance adheres to the flat sheet plastic material.

4. Safety helmet

BACKGROUND	• • • •		Estonia	*	
[0002] The present invention relates generally to the field of	bicycle helmets and specifically to bicycle helmets designed for im	proved ventilation.	Finnish		
[0003] Bicycle helmets are designed to protect a user's hear	d in the event of an accident. Bicycle helmets typically include a thi	ck liner of expanded polystyrene (EPS) covered with a thin	French	44	
shell of a hard plastic material, such as lexan, polycarbonate	e, or acrylonitrile butadiene styrene (ABS).		German	G. 1	
[0004] In order to increase a user's comfort when riding a bi For example, ventilation may include inlet ventilation ports o through the bicycle helmet. As bicycle helmet design has ev the helmet.	cycle, bicycle helmets may be designed to be lightweight and/or to n the front of the bicycle helmet and outlet ventilation ports on the r olved, ventilation ports have generally become larger and more nu	have ventilation so that the user's head is cooled while riding. ear of the bicycle helmet, thereby facilitating the flow of air merous in order to increase the amount of air flowing through	3		
[0005] As the size of ventilation ports have increased, reinfoventilation ports in order to provide strength to the underlying layer of EPS.	rcing struts have been added to enhance the strength of the bicycle g liner. Struts can be made of a variety of materials, such as plastic	e helmet. These struts can extend laterally across the mesh or plastic strip, and the struts are often covered with a		FIG. 2
