Cesta k vyhledávací masce

The screenshot shows the OpenAIRE website interface. The browser address bar displays <https://beta.openaire.eu>. The navigation menu includes: PARTICIPATE, **SEARCH** (highlighted with a red circle), MONITOR, SUPPORT, and OPEN ACCESS. A dropdown menu for 'SEARCH' is open, listing: Publications, data, projects. (highlighted with a red circle), Data Providers, and General information. The main content area features a lighthouse image and a yellow banner with the text: 'Observatory of Europe's ...research output ...OA infrastructures ...policies'. Below this is a section for 'Open Access Week 2015!' with a logo and the text 'OPEN FOR COLLABORATION' and 'OCTOBER 19 - 25, 2015'. At the bottom, there are two columns: 'RESEARCHERS' with the text 'Why Open Access. How to comply. What services to use.' and 'DATA PROVIDERS' with the text 'How to make your content more visible. What to do to increase quality. How to join.'

COLLABORATION
OCTOBER 19 - 25, 2015

OpenAIRE supports and encourages open access via its infrastructure and services and will be actively participating in the 8th International Open Access Week 'Open for Collaboration' with a series of webinars and spotlights on its services and resources. Our activities during Open Access Week 2015 will target researchers, research administrators, project coordinators and open access advocates. Look at the schedule to find out about what is offered for you!

THE INTERGENERATIONAL CONTENT OF SOCIAL SPENDING : HEALTH CARE AND SUSTAINABLE GROWTH IN CHINA

Fitoussi, Jean-Paul; Saraceno, Francesco (2008)

Publisher: HAL CCSD

Languages: English

Types: Article

Subjects: [SHS:ECO] Humanities and Social Sciences/Economies and finances, social spending, Chinese economy, [SHS:ECO] Sciences de l'Homme et Société/Economies et finances, saving gluts, sustainable growth, health care, [SHS:ECO] Humanities and Social Sciences/Economies and finances

The paper endorses the thesis that current macro imbalances are partly due to an excess of household savings in China, whose origin is to be found among other things in household uncertainty about the provision of public services like health care, pensions and education. Focusing on health services, because of their priority in the concerns of the Chinese people, we describe the recent trends in the provision of health care. We then argue that social spending by the government may have important intergenerational content, in that it allows higher private spending, lower inequality, higher levels of human capital and the like. All these factors are related to the potential growth rate of the economy. We conclude that a more important role of the government in the sector of public services, and in particular of health care, may help reduce the possibility of future bottlenecks, and hence help keeping the Chinese economy on a sustainable growth path. We conclude the paper by an assessment of the current debate on how to reform the system, and we advocate universal publicly funded basic health coverage.
