Pokročilé vyhledávání

The screenshot shows the ProQuest search interface. At the top, there's a navigation bar with 'ProQuest' and 'Všechny databáze | Change databases'. Below that, 'ProQuest Central' is displayed with tabs for 'Jednoduché hledání', 'Pokročilé hledání', 'Publikace', 'Procházet', and 'Info'. The 'Pokročilé hledání' section has sub-tabs: 'Command Line', 'Tezaurus', 'Kódy polí', and 'Nápověda'. The 'Tezaurus' tab is circled in red. A search box contains the query 'terroris* AND attack* AND (cost* OR financ*)'. To the right, a dropdown menu is open, showing options like 'Kdekoli', 'Kdekoliv kromě plného textu - ALL', 'Abstrakt - AB', etc. A red box highlights the 'Tezaurus' tab with the text 'Možnost výběru polí'. Another red box highlights the search options (AND/OR, filters) with the text 'Možnost nastavení různých vyhledávacích omezení'. A red arrow points from the 'Tezaurus' tab to the dropdown menu.

Práce s tezaurem

The screenshot shows the ProQuest Thesaurus interface. At the top, the browser address bar shows the URL: [http://search.proquest.com/pqcentral/thesaurus/browsepage/\\$N/queryTermField/false/false?accountid=12552](http://search.proquest.com/pqcentral/thesaurus/browsepage/$N/queryTermField/false/false?accountid=12552). Below the browser bar, there is a navigation bar with a back arrow and the text "Select another thesaurus". The main heading is "ProQuest Thesaurus (subjects)". A search bar contains the term "infrastructure" and a "Find" button. Below the search bar, there are radio buttons for "Contains word(s)" and "Begins with". A "Browse terms" section shows a list of letters from A to Z, with "All" selected. Below this, there is a link "Click a term in the list below to see available narrower, broader, and related terms. Learn more". The "Subject terms found:" section lists several terms with checkboxes: "Building infrastructure", "Community infrastructure levy-UK", "Infrastructure", "Infrastructure (Buildings)", "Infrastructure (Economics)", and "Public Key Infrastructure". The "Public Key Infrastructure" term is highlighted in yellow. A red dashed box highlights the "Public Key Infrastructure" term, and a red arrow points from it to a red box containing the text "Zpřesnění deskriptoru". Another red arrow points from a red box containing the text "Výběr z nabídky a přenesení deskriptoru do vyhledávací masky" to the search bar. At the bottom right, there is a "Combine using:" section with radio buttons for "OR", "AND", and "NOT", and buttons for "Add to search" and "Close". The Windows taskbar is visible at the bottom of the screen.

The screenshot shows the ProQuest search results page for the query "critical infrastructure". The page includes a search bar, filters for "Full text" and "Peer reviewed", and a list of 2,175 results. A red dashed box highlights the user profile icon in the top right corner, with a text box stating: "Možnost vytvoření vlastní schránky a ukládání výsledků a dotazů". A red oval highlights the "Save to My Research" button in the action menu, with a red arrow pointing to it from the text box. Another red arrow points from the text box to the "Export/Save" section of the menu. The menu also lists other export options: RefWorks, EasyBib, HTML, PDF, RIS (works with EndNote, Citavi, etc.), and RTF (works with Microsoft Word).

ABSTRACT (SUMMARY)

Issue Title: Special Issue: Nanotechnology and nanomaterials: current aspects of safety assessment and regulation

Personal care products (PCP) often contain micron- or nano-sized formulation components, such as nanoemulsions or microscopic vesicles. A large number of studies suggest that such vesicles do not penetrate human skin beyond the superficial layers of the stratum corneum. Nano-sized PCP formulations may enhance or reduce skin absorption of ingredients, albeit at a limited scale. Modern sunscreens contain insoluble titanium dioxide (TiO₂) or zinc oxide (ZnO) nanoparticles (NP), which are efficient filters of UV light. A large number of studies suggest that insoluble NP do not penetrate into or through human skin. A number of in vivo toxicity tests, including in vivo intravenous studies, showed that TiO₂ and ZnO NP are non-toxic and have an excellent skin tolerance. Cytotoxicity, genotoxicity, photo-genotoxicity, general toxicity and carcinogenicity studies on TiO₂ and ZnO NP found no difference in the safety profile of micro- or nano-sized materials, all of which were found to be non-toxic. Although some published in vitro studies on insoluble nano- or micron-sized particles suggested cell uptake, oxidative cell damage or genotoxicity, these data are consistent with those from micron-sized particles and should be interpreted with caution. ...
