Nová verze nástroje pro vyhledání mezinárodně zapisovaných ochranných známek ROMARIN je k dispozici **od dubna 2010**

- Databáze ROMARIN obsahuje informace o všech mezinárodních známkách zaznamenaných v rámci Madridského systému, které jsou v současné době v řízení, platné a nebo jejich platnost vypršela během posledních šesti měsíců. Zahrnuje také označení, která jsou předmětem přezkumného řízení ve WIPO.
- Obsahuje více jak 800 000 známek (12/2012)

## Příklady vyhledávání

Tato stránka obsahuje některé příklady možných vyhledávání a popis tagů, které mohou být použity pro pokročilé vyhledávání. Na rozdíl od jednoduchého vyhledávání, které vyhledá pouze ve 14 polích databáze a které jsou zpracovávány automaticky, můžete využít pokročilé vyhledávání všechna pole databáze a libovolně je formulovat. Rozšířené vyhledávání vyžaduje znalost názvů použitých tagů.

## Search Examples

This page contains some examples of possible searches and the description of the tags which may be used for advanced searching. Unlike simple searches which only search 14 fields in the database and which are handled automatically, advanced searches can harness all the fields of the database and need to be formulated manually by using the buttons at your disposal. Advanced searching requires that you know the name of the tags used in the document in XML format. We suggest you download a ROMARIN document and open it either in your browser, or a text or XML editor.

Below is a guide to using the tags, as well as a list of the tags with their description.

### How to use the tags?

The ROMARIN document is in XML (eXtended Markup Language) format and consists of groups and sub-groups.

The main tag of the document is:

```
/MARKGR
```

This is the group which contains all the other elements and sub-groups forming either elements such as the name of the holder, or all the events affecting the mark. Searching using the name of this group is possible, but is not very rewarding as the search results would list all the marks in the database (over and above the fact that searches are limited to 2000 hits). It is more meaningful to add a sub-group to the search, such as searching for international registration number 800000:

```
(/MARKGR/INTREGN contains 800000)
```

The elements which may be added to /MARKGR are:

/INTREGN	International Registration Number
/OOC	Office of Origin
/INTREGD	Date of the registration
/EXPDATE	Expected expiration date of the registration/renewal
/ORIGLAN	Language of the application (1 = English - 3 = French - 4 = Spanish)

The secondary tag is used for the current state of the mark:

```
/MARKGR/CURRENT
```

This is the group which lists all the elements and sub-groups used for the name of the holder, representative, mark, etc. Try searching for the term "organisation" for example, in the holder group:

```
(/MARKGR/CURRENT/HOLGR contains organisation)
```

The request as formulated above searches for the term "organisation" in all the fields of the holder group, i.e. both in the name field and the address field, etc. To narrow your search to just the holder name field, you need to specify the field:

```
(/MARKGR/CURRENT/HOLGR/NAME/NAME1 contains organisation)
```

The elements which may be added to /MARKGR/CURRENT are:
