How to browse the DDC

This browsing tool is subdivided into 3 levels. Example: Main class 5 (Science), Division 53 (Physics), Section 539 (Modern physics). Click on an entry to get to the next sub-level. Click on the link "View Records" to start searching BASE for documents within this main class, division or section. If you search for a main class, the divisions and sections are automatically searched as well, if you search for a division the sections are automatically searched as well.

This browsing tool is based on the **Dewey Decimal Classification (DDC)**. The DDC attempts to organize all fields of knowledge into ten main classes. The ten main classes are then further subdivided: Each main class is divided into ten divisions and each division consists of ten sections. So there are 10 main classes, 100 divisions and 1000 sections.

The DDC categorization of the documents is accomplished in a twofold manner: First, there are sources that provide DDC numbers for their records already, which are included in the browsing directly. Second, we perform automatic classification of documents in the context of BASE. The techniques necessary for this step have been developed by the project "Automatic Enhancement of OAI Metadata", funded by the German Research Foundation (DFG).
