Abstract

In this paper, we examine the nature of the shocks that hit the small- and medium-sized enterprises (SMEs) in Japan during the global financial crisis that occurred in the wake of the massive number of non-performing subprime loans in the U.S. We examine how the SMEs responded to the shocks, using the unique surveys that were conducted by the Research Institute of the Economy, Trade and Industry in 2008 and 2009. The shocks were identified as demand, supply, and financial shocks. The demand shock was the most prevalent of the shocks, while the financial shock was least frequent. The SMEs took a spectrum of measures against
