OpenDOAR (adresář repozitářů open access)

<https://v2.sherpa.ac.uk/opensoar/>

The screenshot shows a web browser window with the OpenDOAR search page. The browser's address bar displays the URL `v2.sherpa.ac.uk/opensoar/search.html`. The page header includes the Jisc logo and the text "Digital Resources > Open Access". The main navigation bar features links for "About", "Directory", "Statistics", "Tools and support", "Our Work", and "Contact". Below this, the "Search" section is visible, with the instruction "Enter the name of a repository, or use the advanced search and browse options." A search form contains a "Repository Name" input field and a "Search" button. Below the input field, two buttons are highlighted with a red rectangle: "Browse by Country" and "Advanced Search". The footer of the page contains three service guides: "Open access services from Jisc", "Sherpa Services", and "Managing open access costs".

Welcome to the Registry of Open Access Repositories

Notice:

We had a major storage controller failure, which led to the harvesting service failing. We are in the process of recovering data and restarting the harvesting. This failure only affects the tracking of content growth. New repositories should continue to be registered as they are all being fully processed as previously.

We are doing everything we can to bring the service back to normal and we apologise for the interruption to the service.

The aim of ROAR is to promote the development of open access by providing timely information about the growth and status of repositories throughout the world. Open access to research maximises research access and thereby also research impact, making research more productive and effective. [More information...](#)

About DART-Europe

DART-Europe was founded in 2005 as a partnership of national and university libraries and consortia to improve global access to European research theses.

DART-Europe E-theses Portal

Volně přístupný portál pro přístup k více než 1,3 mil. vysokoškolských prací na 579 univerzitách ve 29 evropských zemích. Portál spravuje University College London (UCL).

Vyhledávací možnosti:

- * pro pravostranné rozšíření,
- lze používat operátory AND, OR a NOT (malá i velká písmena), operátor AND je stabilně nastaven,
- fráze: uvozovky nahoře z obou stran slovního spojení, příklad: *"information literacy"* .

Title	A longitudinal study of anxiety, self-esteem and personality of bullying groups
Author	Connolly, Irene
Subject(s)	Education, Ph.D.; Ph.D. Trinity College Dublin
Abstract	THESIS 7856.1THESIS 7856.2Bullying can be defined as "repeated aggression, verbal, psychological or physical conducted by an individual or group against others" (Department of Education, 1993. p.6). Once regarded as a childhood issue, the prolonged suffering of victims into adulthood, the quality of their relationships and their ability to operate effectively in the workplace is an area of concern. These children mature into adults with self-esteem issues, anxiety about life in general and feelings of inadequacy. Being the victim of bullying can persist in adulthood, as the coping skills necessary to deal with the problem have not been suitably developed. For the victims it may lead to a life of depression and low self-esteem causing problems in adult relations and accomplishments. The victims may never develop appropriate self-confidence, preventing them from engaging in adult relationships and pursuing careers. It may in extreme cases even lead to them committing suicide. The bully themselves appear to suffer in a similar manner. The skills for living a well-adjusted life are underdeveloped or simply do not exist at all. They too appear to suffer from relationship problems, a pattern of aggressive behaviour that makes familial relationships difficult; low self-esteem and high anxiety also appear to be characteristic of the adult bullies.
Publisher	Trinity College (Dublin, Ireland). School of Education
Contributor	O'Moore, Mona
Date	2003
