About DART-Europe

DART-Europe was founded in 2005 as a partnership of national and university libraries and consortia to improve global access to European research theses.

DART-Europe E-theses Portal

Volně přístupný portál pro přístup k více než 1 mil. vysokoškolských prací na 575 univerzitách ve 29 evropských zemích. Portál spravuje University CollegeLondon.

Vyhledávací možnosti:

- * pro pravostranné rozšíření,
- lze používat operátory AND, OR a NOT (malá i velká písmena), operátor AND je stabilně nastaven,
- fráze: uvozovky nahoře z obou stran slovního spojení, příklad: *"information literacy"* .

Title	A longitudinal study of anxiety, self-esteem and personality of bullying groups
Author	Connolly, Irene
Subject(s)	Education, Ph.D.; Ph.D. Trinity College Dublin
Abstract	THESIS 7856.1THESIS 7856.2Bullying can be defined as "repeated aggression, verbal, psychological or physical conducted by an individual or group against others" (Department of Education, 1993. p.6). Once regarded as a childhood issue, the prolonged suffering of victims into adulthood, the quality of their relationships and their ability to operate effectively in the workplace is an area of concern. These children mature into adults with self-esteem issues, anxiety about life in general and feelings of inadequacy. Being the victim of bullying can persist in adulthood, as the coping skills necessary to deal with the problem have not been suitably developed. For the victims it may lead to a life of depression and low self-esteem causing problems in adult relations and accomplishments. The victims may never develop appropriate self-confidence, preventing them from engaging in adult relationships and pursuing careers. It may in extreme cases even lead to them committing suicide. The bully themselves appear to suffer in a similar manner. The skills for living a well-adjusted life are underdeveloped or simply do not exist at all. They too appear to suffer from relationship problems, a pattern of aggressive behaviour that makes familial relationships difficult; low self-esteem and high anxiety also appear to be characteristic of the adult bullies.
Publisher	Trinity College (Dublin, Ireland). School of Education
Contributor	O'Moore, Mona
Date	2003
Type	Doctoral thesis
