Private investment under macroeconomic a

Klaus Schmidt-Hebbel, Tobias Muller

Last edited: 2016-07-21 (UTC)

A significant domestic counterpart of Morocco's vigorous external adjustment in the eighties was a decline in fixed capital formation, of which the private sector bore a sizable share. The authors focus on the causes of declining private investment and on the policies required to reverse this trend. ...

Workers' remittances to developing countries : a survey with central banks on selected public policy issues

Jose De Luna Martinez

Last edited: 2016-07-21 (UTC)

This paper presents the findings of a survey conducted by the World Bank of central banks in 40 developing countries across different regions in the world. The survey focused on the following topics: (1) coverage of national statistics on remittances, (2) cost of transferring and delivering remittances ...

Title	Viral marketing A new branding strategy to influence consumers.
Degree	M.A. -- University of Ottawa, 2012
Publisher	Ottawa :Library and Archives Canada = Bibliothèque et Archives Canada,2013.
Description	1 online resource
Notes	Includes bibliographical references.
Abstract	<?Pub Inc> The rapid penetration of the Internet and the prevalence of various social media facilitated by new technologies provide new opportunities for how marketing techniques are developed and refined. The creation of viral marketing has been driven by technological innovations and cultural changes. Responding to marketing trends and catering to consumers' psychological demands and behavioral changes, viral marketing represents the latest online customer-centric marketing (Shukla, 2010). Extending the advertising effects of word-of-mouth (WOM) communication and Internet marketing, viral marketing has demonstrated considerable success and utility in a promotional phase and development process of a product and/or service. This study intends to illustrate the benefits and challenges of viral marketing. The effects and concerns with the adoption of viral marketing are reinforced by previous research and findings from marketer and consumer focus groups. This thesis will contribute to building a theoretical and empirical foundation for viral marketing research and professional practice.

The purpose of TEL (thèses-EN-ligne) is to facilitate the self archiving of these manuscripts, which are important documents for direct scientific communication between scientists. TEL is actually a particular "environment" of HAL. It therefore has the same objective: make scientific documents available to scientists all around the world, rapidly and freely, but with a restriction to PHD thesis and habilitations (HDR, in countries where habilitations exist). CCSD does not make any scientific evaluation of the theses that are submitted, since this is the responsibility of the university professors in the examination board.

TEL is also accessible through OAI (Open Archives Initiative), tools and the OAI-PMH protocol, with the URL api.archives-ouvertes.fr/oai/tel

en Caractérisation de l'aérosol industriel et quantification de sa contribution aux PM 2.5 atmosphériques

fr

Alexandre Sylvestre ¹ Details

1 LCE - Laboratoire Chimie de l'environnement

en **Abstract** : In order to limit the impact of air quality on human health, public authorities need reliable and accurate information on the sources contribution. So, the identification of the main sources of PM2.5 is the first step to adopt efficient mitigation policies. This work carry out in this thesis take place in this issue and was to determine the main sources of PM2.5 inside an industrial area. To determinate the main sources of PM2.5, two campaigns were lead to collect daily PM2.5 to: 1/ determine the enrichment of atmospheric pollutants downwind from the main industrial activities and 2/ collect PM2.5 in urban areas characteristic of the population exposition. Results allowed to obtain very representative profiles for the main industrial activities implanted inside the studied area. ME-2 analysis, combined to radiocarbon measurements, allowed to highlight the very high impact of Biomass Burning sources for all the PM2.5 pollution events recorded from early autumn to March. This study showed that industrial sources, even if they are the major sources during spring and summer, are not the major PM2.5 driver. However, this study highlights that industrial sources impact significantly the aerosol population (size, composition, etc.) in the studied area.

SCHOLARLY INFRASTRUCTURES FOR RESEARCH SOFTWARE: REPORT FROM THE EOSC EXECUTIVE BOARD WORKING GROUP (WG) (9/12/20)

The Task Force on Scholarly Infrastructures of Research Software, as part of the Architecture WG of the European Open Science Cloud (EOSC) Executive Board, has established a set of recommendations to allow EOSC to include software.

WEBINARS (7/12/20)

The open archive HAL

HAL is an open archive where authors can deposit scholarly documents from all academic fields.

For the attention of the authors

- The deposit of the fulltext should be made in agreement with the co-authors and in the respect for the policy of the publishers.
- The deposit is subject of a control, HAL reserves the right to refuse items that do not meet the criteria of the archive.
- Any deposit is definitive, no withdrawals will be made after the on-line posting of the publication.
- Text files in pdf format or image files are sent to CINES for long-term archiving.

For the attention of the readers

- In a context of electronic distribution, each author keeps their intellectual property rights.

LATEST SUBMISSIONS IN HAL

Sagyn Omirbekov. Polluted soil remediation using surfactant foam injection : experiments and upscaling. Material chemistry. HESAM Université, 2020. English. (NNT : 2020HESAE025). (tel-03048671)

The socialist work groups: from the Soviet case to the Czechoslovak one: Cahiers du CEFRES N° 30, Le communisme à partir des sociétés - Communism from the viewpoint of societies

Dalibor Státník¹ Details

¹ SOKA - Státní Oblastní archiv v Praze

Abstract : Státník's paper is a study of socialist work groups based both on archives and personal experience and addresses the underlying doctrine of the „participation of workers in the management of the economy“. It highlights the „socialist emulation in the Soviet Union“, and the specificities of its application in Czechoslovakia, to conclude on the appropriateness issue of writing History as a direct witness.

Abstract

In this dissertation, I examine the influence of consumer identity (e.g., materialism, self-construal) on marketing strategy targeting young consumers (i.e., millennials). In Essay 1, I explore how materialistic consumers can be nudged to act prosocially by leveraging their status-seeking motivations in the context of luxury consumption, and luxury brands will maximize participation of consumers by utilizing product-linked cause-related marketing (CRM) campaigns. In Essay 2, I investigate the effects of individualism (vs. collectivism) on preferences for meeting belonging needs through digitally mediated social interaction, through the lens of lower social interaction costs.

ORGANIC POLLUTION OF RIVERS : COMBINED THREATS OF... (2017)

OPEN ACCESS

Main

Title	Organic pollution of rivers : Combined threats of urbanization, livestock change
Published in	Scientific Reports, Vol. 7. ISSN 2045-2322.
Author	Wen, Y., Schoups, G.H.W., van de Giesen, N.C.
Date	2017-02-23
Reference(s)	Water Resources (C CITG WM WRS), General
Language	English
Type	Article
Abstract	Organic pollution of rivers by wastewater discharge from human activities negatively impacts people and ecosystems. Without treatment, pollution control relies on a combination of natural degradation and dilution by natural runoff to reduce downstream effects. We quantify here for the first time the global sanitation crisis through its impact on organic river pollution from the threats of (1) increasing wastewater discharge due to urbanization and intensification of livestock farming, and (2) reductions in river dilution capacity due to climate change and water extractions. Using in-stream Biochemical Oxygen Demand (BOD) as an overall indicator of organic river pollution, we calculate historical (2000) and future (2050) BOD concentrations in global river networks. Despite significant self-cleaning capacities of rivers, the number of people affected by organic pollution (BOD >5 mg/l) is projected to increase from 1.1 billion in 2000 to 2.5 billion in 2050. With developing countries disproportionately affected, our results point to a growing need for affordable wastewater solutions.

Title	en : Self-Determined English Learning Motivation and Value System of Japanese Female College Students
Alternative	ja : Self-Determined English Learning Motivation and Value System of Japanese Female College Students
Creator	ja : 矢澤, オーリア en : Olya, Yazawa
Description	Other : This study was conducted in Showa Women's University among freshmen, sophomore, and junior students from the Department of Business Design at the end of the spring semester 2018 (N = 378) and aimed at assessing the students' levels of self-determined motivation and need satisfaction in English language classroom. The results of this study showed that there is a direct link between autonomous motivation and the students' healthier well-being (psychological needs support). The satisfaction of the need for competence had the greatest positive effect on the students' self-determined motivation, which suggests that probably in Japanese university settings, female business major students' Achievement values are dominant. At the same time, sophomore students in this study demonstrated bigger frustration of their needs support in classes with English teachers, than freshmen did. Based on that, it seems appropriate to seek to design a pedagogical program that would develop values of Benevolence, Conformity, Self-direction and Stimulation, and facilitate professional motivation to learn English among Japanese female business major students.

Note and Description

Now-a-days many developing countries are suffering from high motorization trend that has produced several unwanted by products. Though private vehicles provide high level of access and freedom but have enormous associated risks in the form traffic congestion and accidents, noise and air pollution and high energy consumption. Admitting these facts, many developing countries have initiated efficient mass transit systems to relieve these side effects. These systems provide a comfortable, safer and efficient services and so can be fairly preferred over private vehicles. Also the target of these systems is same as to cut down the private vehicle usage by attracting commuters from diverse social income classes other than low ones. However most of these systems are planned and designed independently, leading to the difficulties in accessing and egressing. Accessibility of these systems, which is one of the basic components of performance measure used for transit (Wardman 2004), is still crucial in most of the developing countries. Lack of any regular feeder services creates gap between ones'

抄録	Now-a-days many developing countries are suffering from high motorization trend that has produced several unwanted by products. Though private vehicles provide high level of access and freedom but have enormous associated risks in the form traffic congestion and accidents, noise and air pollution and high energy consumption. Admitting these facts, many developing countries have initiated efficient mass transit systems to relieve these side effects. These systems provide a comfortable, safer and efficient services and so can be fairly preferred over private vehicles. Also the target of these systems is same as to cut down the private vehicle usage by attracting commuters from diverse social income classes other than low ones. However most of these systems are planned and designed independently, leading to the difficulties in accessing and egressing. Accessibility of these systems, which is one of the basic components of performance measure used for transit (Wardman 2004), is still crucial in most of the developing countries. Lack of any regular feeder services creates gap between ones' origin and mass transits station that cause dissatisfaction to commuters and they lose patronage towards these systems. Currently paratransit is emerging as dominating feeder mode in several developing countries and connecting commuters from residence to public transport systems. However these paratransit have certain service areas and potential passengers. Also most of these are informal, not well organized and unsatisfactory and their movement is restricted to certain parts of the cities. Therefore a detailed evaluation is essential, also from commuters' viewpoint, before implementing them as feeder. Unlike paratransit, a regular feeder bus, a form of public transport, can provide safer, comfortable and reliable service and will be free from the enormous risks as associated with paratransit. However a regular feeder bus requires a

Fraunhofer-Publica

Charakteristika

- <http://publica.fraunhofer.de/starweb/pub09/index.htm>
- <http://publica.fraunhofer.de/starweb/pub09/en/index.htm> (v angličtině)
- Zachycuje publikační činnost a patenty Fraunhoferovy společnosti v Německu. Jedná se o největší evropskou organizaci zabývající se aplikovaným výzkumem. 24 500 zaměstnanců pracuje v 69 ústavech.

Fraunhofer-Publica

Základní vyhledávání

The screenshot displays the Fraunhofer-Publica website in a web browser. The browser's address bar shows the URL `publica.fraunhofer.de/starweb/pub09/en/index.htm`. The website's header includes the Fraunhofer logo and the word "Publica". A sidebar on the left contains a menu with items like "Search Form" and "Current Publications", with "Search Form" highlighted by a red dashed box. The main content area features a large image of a computer mouse on a desk. Below this image is a search bar containing the text "nano* toxi*" and a "Search" button, both enclosed in a red solid box. Below the search bar, the text "use the asterisk (*) as a truncation symbol" is visible. The page also includes a section titled "Publication Database of the Fraunhofer-Gesellschaft" with a brief description of the database's contents. At the bottom of the page, there is a footer with copyright information and links for "Contact", "Imprint", and "Data Protection".

Publication Database of the Fraunhofer-Gesellschaft

The database "Fraunhofer-Publica" documents the research-related publications and patents of the Fraunhofer institutes.

Contained in this database are bibliographic data of articles, conference papers and proceedings, research reports, studies, theses, patents, etc. that are written by researchers of the Fraunhofer-Gesellschaft.

Pokročilé vyhledávání

The screenshot shows the Fraunhofer-Publica website in a web browser. The browser's address bar displays the URL `publica.fraunhofer.de/starweb/pub09/servlet.starweb`. The page features a navigation menu on the left with the following items: Main, Search Form, Search (highlighted with a red box), Search Help, Current Publications, Document Delivery, Fulltext Access, Guidelines, and Contact. A red arrow points from the 'Search' menu item to the search form on the right. The search form is titled 'Search' and includes input fields for 'Keyword' (containing 'nano* toxi*'), 'Person', and 'Year' (with a range selector 'through' and '(yyyy)'). Below the input fields are buttons for 'Search', 'Clear all', and 'Help'. The footer of the page contains the copyright notice '©2014 Fraunhofer-Gesellschaft' and links for 'Contact', 'Imprint', and 'Data Protection'.

Abstract
The use of silver nanoparticles (AgNPs) in consumer products such as textiles leads to their discharge into wastewater and consequently to a transfer of the AgNPs to soil ecosystems via biosolids used as fertilizer. In urban wastewater systems (e.g., sewer, wastewater treatment plant [WWTP], anaerobic digesters) AgNPs are efficiently converted into sparingly soluble silver sulfides (Ag₂S), mitigating the toxicity of the AgNPs. However, long-term studies on the bioavailability and effects of sulfidized AgNPs on soil microorganisms are lacking. Thus we investigated the bioavailability and long-term effects of AgNPs (spiked in a laboratory WWTP) on soil microorganisms. Before mixing the biosolids into soil, the sludge was either anaerobically digested or directly dewatered.

LAOAP

Latin American Open Archives Portal

- <http://lanic.utexas.edu/project/laoap/>
- Portál zaměřený na šedou literaturu open access ze společenských věd ze zemí Latinské Ameriky.
- Byl vytvořen za finanční podpory USA. Na jeho vzniku se podílely univerzity v USA.

LAOAP: Providing Access to Latin American Grey Literature

Search the Archives:

leadership Search

About

The **Latin American Open Archives Portal** is a project of the [Latin Americanist Research Resources Project - LARRP](#), in collaboration with the [Latin American Network Information Center - LANIC](#), to improve access to social sciences grey literature produced in Latin America. The portal provides access to working documents, pre-prints, research papers, statistical documents, and other difficult-to-access materials from the "deep Web." Typically, this content is published by research institutes, non-governmental organizations, and peripheral agencies that are not controlled by commercial publishers.

Utilizing the Open Archives Initiative Protocol for Metadata Harvesting (OAI-PMH) as a low-barrier solution to disseminate and share digital resources, the portal provides access to digital content from participating data providers and specialized searching services for the Latin Americanist social sciences research community.
